

Git Repository Forensics Investigation Report

Case ID	GIT-CASE-484E2E3C
Repository Name	diwakar-1255_advanced-honeypot-platform_8b0194a7
Repository Path	C:\Users\Hp\Downloads\git-repository-forensics-tool-github-url\git-repository-forensics-to
Investigator	Ramya
Scan Date	2026-07-01 14:57:21
Active Branch	main

Repository Summary

Metric	Value
Total Commits Analyzed	25
Total Contributors	3
Total Findings	32
Suspicious Commits	17
Secrets Detected	15
Deleted Sensitive Files	0
High Risk Findings	22

Major Findings

Type	Severity	Score	Commit	File	Evidence
Password Found	Critical	90	e32c24383e25	daily_soc_report.py	smtp_password = env.get("SMTP_PASSWORD", "")
Password Found	Critical	90	e32c24383e25	docker-compose.yml	GF_SECURITY_ADMIN_PASSWORD: \${GRAFANA_ADMIN_PASSWORD:-change-me-now}
Password Found	Critical	90	2f9a9d812b07	.env.example	GRAFANA_ADMIN_PASSWORD=change_this_password
Password Found	Critical	90	2f9a9d812b07	docker-compose.yml	POSTGRES_PASSWORD: \${POSTGRES_PASSWORD}
Password Found	Critical	90	71695003a979	web-honeypot/main.py	DB_PASSWORD=REDACTED
Password Found	Critical	90	d23e72ab65e2	web-honeypot/main.py	"response": "APP_ENV=production\nDB_HOST=internal-db.nexacloud.local\nDB_US...
Password Found	Critical	90	44a961fa01be	web-honeypot/main.py	"response": "APP_ENV=production\nDB_HOST=internal-db.nexacloud.local\nDB_USER...
Password Found	Critical	90	b92212dc1eb8	.env.example	POSTGRES_PASSWORD=CHANGE_ME_STRONG_PASSWORD
Password Found	Critical	90	b92212dc1eb8	.env.example	GRAFANA_ADMIN_PASSWORD=CHANGE_ME_STRONG_PASSWORD
Password Found	Critical	90	b92212dc1eb8	.env.example	SMTP_PASSWORD=CHANGE_ME
Password Found	Critical	90	b92212dc1eb8	create_grafana_dashboard.py	PASSWORD = os.getenv("GRAFANA_ADMIN_PASSWORD", "")

Password Found	Critical	90	824274b54ad3	api/soc_alert_notifier.py	SMTP_PASSWORD = os.getenv("SMTP_PASSWORD", "")
Password Found	Critical	90	47e49c3d6c11	add_attacker_investigation_center.py	GRAFANA_PASSWORD = os.getenv("GRAFANA_ADMIN_PASSWORD", "")
Password Found	Critical	90	7a0beeb647c1	optimize_current_dashboard_refresh.py	GRAFANA_PASSWORD = os.getenv("GRAFANA_ADMIN_PASSWORD", "")
Secret Found	Critical	85	71695003a979	web-honeypot/main.py	JWT_SECRET=REDACTED
Authentication Code Modified	High	75	e32c24383e25	DEPLOYMENT_SECURITY_STATUS.md	Security-related file modified: DEPLOYMENT_SECURITY_STATUS.md
Authentication Code Modified	High	75	dfb2eaec49a5	DEPLOYMENT_SECURITY_STATUS.md	Security-related file modified: DEPLOYMENT_SECURITY_STATUS.md
Large Code Deletion	High	70	67bcd38b597e		Commit deleted 4347 lines.
Large Code Deletion	High	70	5111da072f94		Commit deleted 648 lines.
Large Code Deletion	High	70	cc6ea1ee4e8c		Commit deleted 134 lines.
Many Files Modified	High	60	67bcd38b597e		Commit changed 31 files.
Many Files Modified	High	60	5111da072f94		Commit changed 10 files.
Outside Working Hours Commit	Medium	55	ea2610620f28		Commit made outside normal working hours at hour 23.
Outside Working Hours Commit	Medium	55	e32c24383e25		Commit made outside normal working hours at hour 4.
Outside Working Hours Commit	Medium	55	d93f4bf1242b		Commit made outside normal working hours at hour 4.

Recommendations

1. Password Found: Change the exposed password immediately and store credentials in a secret manager or environment variables.
2. Password Found: Change the exposed password immediately and store credentials in a secret manager or environment variables.
3. Password Found: Change the exposed password immediately and store credentials in a secret manager or environment variables.
4. Password Found: Change the exposed password immediately and store credentials in a secret manager or environment variables.
5. Password Found: Change the exposed password immediately and store credentials in a secret manager or environment variables.
6. Password Found: Change the exposed password immediately and store credentials in a secret manager or environment variables.
7. Password Found: Change the exposed password immediately and store credentials in a secret manager or environment variables.
8. Password Found: Change the exposed password immediately and store credentials in a secret manager or environment variables.
9. Password Found: Change the exposed password immediately and store credentials in a secret manager or environment variables.
10. Password Found: Change the exposed password immediately and store credentials in a secret manager or environment variables.
11. Password Found: Change the exposed password immediately and store credentials in a secret manager or environment variables.
12. Password Found: Change the exposed password immediately and store credentials in a secret manager or environment variables.
13. Password Found: Change the exposed password immediately and store credentials in a secret manager or environment variables.
14. Password Found: Change the exposed password immediately and store credentials in a secret manager or environment variables.
15. Secret Found: Validate whether the value is a real secret, rotate it if valid, and remove it from repository history.

Conclusion

This report summarizes forensic indicators discovered from the Git repository history. Findings should be reviewed by the security team and repository owner. Critical and high-risk items such as exposed secrets, deleted sensitive files, and authentication logic changes should be prioritized.
